Apparo Fast Edit®

Management of data in an BI system and standalone together

Architecture for a mixed environment:

BI system & stand-alone

A „**mixed environment**" means:

Apparo Fast Edit installation with Apparo application server(s) for

- **IBM Cognos BI/Analytics or**

- **QlikView or Qlik Sense**

- **SAS**

AND

• Apparo application servers **stand-alone**

• clustering
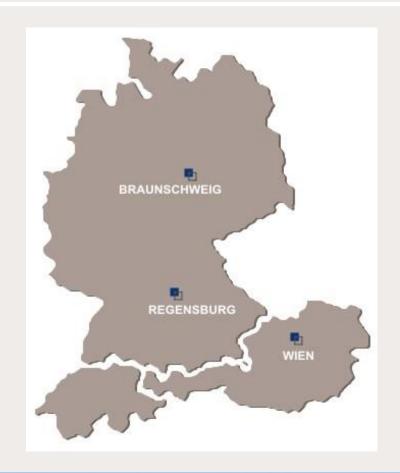

• using the same Apparo repository

Advantage:

Working places without BI license can use the same
Apparo Fast Edit Business Cases:

 reducing license costs

- All Apparo application servers for BI
  must use the same Apparo Gateway/web server

- All Apparo application servers for stand-alone
  must use the same Apparo Gateway/web server

- One Gateway for all application servers for BI system
- One Gateway for all application servers for stand-alone

- One Apparo Repository for all application servers
- Stand-alone version and version for BI must be the same
