

Apparo Fast Edit

Version 3.2

What is new?

- Technology updates: Java 8 OpenJDK (from IBM/Microsoft)
=> valid support
- SQL Variables can use own database connection
=> combine data from different databases
- SAP HANA as new data source
- Caching of lookup values (no waiting if pressing lookup button)
- New widget type „multi select lookup“ for editing/inserting
- New training movies included in Designer
- General better performance

Live-System
